

ALL PEACOCK POINT RESIDENTS:

It is wonderful to see that quite a few properties are being beautified.

With that, there is the responsibility of the owners to be aware of our water lines and what could happen if damaged during any construction or digging.

Please be mindful that while the line supplies your property, it also supplies the properties on both sides of you and across the road.

When planning on doing any digging, contact Marc Vallee at 226-931-5308 or email Marc at mnd.vallee@gmail.com to let them know so that they can let you know where the water lines are buried.

This could avoid damage to the lines and avoid a repair cost to yourself. As long as our water system has been running, it has always been the practice that damages to the waterlines from the box to the main are charged back to the owner.

For your information, any damage to water lines from the box to your residence is the owner's responsibility. So, when starting up or shutting down, they are here to help you.

Our Water Team is always available to help out or to answer any questions. We are a great community with everyone willing to help others. Let's all work together and avoid unnecessary shutdowns of our water to all.

PLEASE USE THE MOTTO "CALL BEFORE YOU DIG"
